Introduction

The *Utah Counties Fact Book* is published yearly by the Utah Association of Counties and is meant to provide county officials, state agencies, associations, private organizations, and citizens with a compilation of useful, county-relevant data. To this end, we've collected data from several federal, state, and county level governments. The information in this book describes the economic, demographic, public safety, and financial characteristics of each of Utah's 29 counties.

Where applicable, we have converted data into a form that allows comparisons across counties. Because we've gathered data from well established sources, we will be able to make the comparisons found in this book for years to come.

This book is divided into two sections. The first section is a county by county, two-page profile of key county statistics. These county profiles offer a snapshot of each county's demographic, fiscal, public safety, and economic standing. The second section is an appendix that presents the same data in table form. The appendix compares the data county to county and year by year.

We appreciate the work various agencies went through to collect the source data we've used. A list of the sources used in this book can be found on page 60.

An electronic version of previous editions of this book is available on our website at uacnet.org as well as other useful data on Utah's counties and links to each county's website.

We would invite suggestions on how to improve future editions and we hope you'll find this book useful.

Source information for the data in this county profile is available on page 60.

Data Sources

Within the previous section, each county's profile has been divided into subsections dealing with population, land ownership, economy, public safety, and public finance.

Data for the population section was compiled from the Utah Population Estimates Committee, the U.S. Census Bureau, and a survey collected by the Utah Counties Insurance Pool. Utah population estimates are found online at the Governor's Office of Planning and Budget website under Demographic and Economic Analysis at www.governor.state.ut.us/dea/. Visit the U.S. Census Bureau at www.census.gov.

Data on land ownership comes from a report by SITLA (School and Institutional Trust Lands Administration). A state map showing the various land ownership is available on their web page at www.trustlands.com.

Economic data regarding employment was obtained from Utah's Department of Workforce Services. You can find their website at jobs.utah.gov. All other Economic data was from the U.S. Census Bureau.

Data on public safety comes from a report issued by the Department of Public Safety, Bureau of Criminal Identification entitled 2007 Crime in Utah Report. Find this report at publicsafety.utah.gov/bci/crimestatistics.html.

Public finance data is from individual county financial reports. They are compiled on the web at www.sao.state.ut.us.

Finally, the *county name origins* came from Utah History Encyclopedia, on the web at www.media.utah.edu/UHE/.
